Tech. VP report...

6M has noise from packet but mostly everything is working.

K1HEJ was listening to the K1FFK repeater on 91, they have the same kind of noise as we do on 15. It's intermod mix from paging, according to N1JGR. It's noise that we can't get away from right now.

Motion to Accept:	N1WGK
Seconded by:	K1DFS

Old Business:

Still waiting on parts to work on the transmitter side of the 440 repeater. Chuck Ayers is trying to find parts for us. The controller that we built actually works! No cold solder joints or anything! Congratulations, Chuck!

The "emergency" 25w 2M repeater that is being worked on by K1DFS isn't receiving right now...he's about ready to give it back to N1JGR and telling him to get the #\$(*#\$ thing working...

Beaconing with APRS: K1HEJ hasn't had a chance to look on line regarding using the automatic garage door openers as an APRS transmitter for the purpose of KLONDIKE. Stay tuned.

New Business:

None worth mentioning
